Never expose batteries / rechargeable batteries to temperatures over 60°C.

Maintenance guide

1. Why is the flashlight easy to scratch?

Because the flashlight is a spray paint process, it is easy to be scratched when it receives a strong external force, please use it carefully.

2. Why is the battery dead?

Because it needs to be transported by sea, it is easy to cause accidents when the battery is fully charged, so please use it with a full charge after receiving the goods.

3. Please feel free to contact us via Amazon's mail system if you have any issues with our products.

We value your suggestions and appreciate them.
